BUREAU OF INDIAN STANDARDS MANAK BHAVAN, 9 BAHADUR SHAH ZAFAR MARG NEW DELHI 110002 Wires and Cables for Electronic Equipment Sectional Committee, LTDC 18

#### **FOREWORD**

This Indian Standard (Part 2/Sec 3) was adopted by the Bureau of Indian Standards on 15 May 1989, after the draft finalized by the Wires and Cables for Electronic Equipment Sectional Committee had been approved by the Electronics and Telecommunication Division Council.

This standard is being brought out in various parts. Part 1 covers radio frequency coaxial cables with solid polyethylene insulation, Part 2 covers radio frequency coaxial cables with polyethylene (semi-solid) insulation and Part 3 covers radio frequency coaxial cables with solid extruded/tape wrapped PTFE insulation. Each of these parts is again issued in several sections. Each section covers a particular type of these cables.

This standard (Part 2/Sec 3) covers polyethylene (semi-solid) radio frequency coaxial cables of characteristic impedance 150 ohms. The cable covered under this standard is generally used for power line carrier communication applications.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2: 1960 'Rules for rounding off numerical values (revised)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

### Indian Standard

# SPECIFICATION FOR RADIO FREQUENCY COAXIAL CABLES

#### PART 2 POLYETHYLENE ( SEMI-SOLID ) CABLES

#### Section 3 Type R 150-5-B 102

#### 1 SCOPE

1.1 This standard specifies dimensions, constructional details and the requirements of polyethylene (semi-solid) radio frequency cables of Type R 150-5-B 102.

#### 2 REFERENCE

IS No.	Title	
IS 5026: 1987	General requirements and tests for radio frequency cables ( first revision )	

#### 3 OUTLINE CONSTRUCTIONAL DRAWING

3.1 The outline constructional drawing of the cable is shown in Fig. 1.

#### **4 CONSTRUCTION**

**4.1** The constructional details of the cable are given in Table 1.

Table 1 Constructional Details

Item	Details	Diameter ( mm )
Inner conductor	Solid plain hard drawn copper	1·40 ± 0·03
Dielectric	Polyethylene semi-air spaced	4·90 ± 0·1
Outer conductor	Single braid, 0.2 mm tinned copper wire Minimum coverage:	ı
Sheath Armour	90% Type 2 Galvanized steel wire	13·00 ± 0·25
	braiding Wire diameter: 0.30	
	Minimum coverage 70%	:
Jacket	Type 2	19·00 ± 0·30

#### **5 REQUIREMENTS**

**5.1** The requirements of the cables are given in Table 2.

Table 2 Requirements

Test	Requirements	Clause Reference of
Dielectric strength Spark test	4000 V (rms)	IS 5026 : 1987 6.7 6.6
a) Dielectric b) Sheath	6 000 V (rms) 3 000 V (rms)	
Insulation resist- ance	10 000 M Ohms/km	<b>6</b> .8
Capacitance ( for information only ) Attenuation:	34 pF/m, Nomina l	6.13 6.11
at 10 kHz at 60 kHz	1·0 dB/km 1·6 dB/km	
at 300 kHz at 500 kHz	3·6 dB/km 5·1 dB/km	
Characteristic impedance	150 ohms $\pm$ 10%	6.10
Weight (approx) (for information only)	350 g/m	6.31

#### 6 ENGINEERING INFORMATION

- **6.1** The engineering information shall be as follows:
  - a) Operating voltage: 1.5 kV rms Max;
  - b) Operating frequency: 500 kHz, Max;
  - c) Power rating: 150 Watts, Nominal;
  - d) Operating temperature range: 15 to 85°C;
  - e) Maximum conductor resistance: 12.8 ohm/km at 20°C;
  - f) Tensile strength of the conductor: 460 N/ mm<sup>2</sup>;
  - g) Elongation of the conductor: 1 percent *Min*; and
  - h) Minimum bending radius: 20 D where D is the overall diameter of the cable.

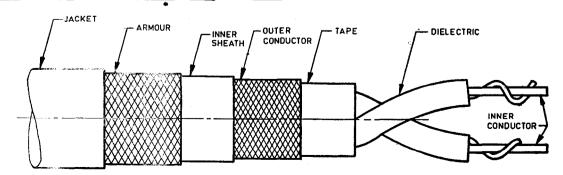

FIG. 1 OUTLINE DRAWING (BALANCED CABLE)

#### Standard Mark

The use of the Standard Mark is governed by the provisions of the Bureau of Indian Standards Act, 1986 and the Rules and Regulations made thereunder. The Standard Mark on products covered by an Indian Standard conveys the assurance that they have been produced to comply with the requirements of that standard under a well defined system of inspection, testing and quality control which is devised and supervised by BIS and operated by the producer. Standard marked products are also continuously checked by BIS for conformity to that standard as a further safeguard. Details of conditions under which a licence for the use of the Standard Mark may be granted to manufacturers or producers may be obtained from the Bureau of Indian Standards.

#### Bureau of Indian Standards

BIS is a statutory institution established under the Bureau of Indian Standards Act, 1986 to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

#### Copyright

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Director (Publications), BIS.

#### Revision of Indian Standards

Indian Standards are reviewed periodically and revised, when necessary and amendments, if any, are issued from time to time. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition. Comments on this Indian Standard may be sent to BIS giving the following reference:
